### **Consulting, Market and Information principles**

ASCAIR GmbH is continuously observing the Marine & Aviation insurance market. We wish to fulfil the wishes and needs of our customers rapidly, efficiently and to the satisfaction of both parties. Most of our employees are themselves water sports enthusiasts who use their experience and specialist knowledge to offer you fair and high-value insurance solutions.

ASCAIR has as the specialist broker pre-selected from the market and offers exclusively own products developed with the insurers. Thereby we agree in part also the involvement of several insurers or insurance consortia, who share the risk to varying degrees. These shares can differ according to the size and use of the vehicle involved and be restructured annually.

The new Insurance Intermediary Law obliges us to provide formalised consulting and documentation. We document on a running basis all the relevant processes for your insurance. A documentation of routine cases and standard processes does not take place, so that the bureaucratic additional effort is kept as low as possible. So that we can continue to act in this manner, we would request you to signify your agreement with our procedure. With your agreement, you assist us to continue to provide you with the specialist consulting which both you and we value.

### **Consulting and Broker's Commission**

Unless otherwise agreed we will be consulting you and will be receiving a commission for our brokerage from the insurance company which will already be included in the insurance premiums.
